Learning Animal Check

Dear parents and caregivers,

our class is taking the Learning Animal Check, a playful way to see how your child likes to learn right now. At the end, your child gets learning tips that fit, a certificate to print and a short result code.

Pictures · Listening · Movement · Talking

Best done together at home

Feel free to sit with your child and read the questions aloud if needed (the version for grades 3 and 4 has a read-aloud button). The answers, though, are your child's to choose. It takes about 10 to 15 minutes. **No test, no grades, no diagnosis.**

How it works

1. Scan the QR code or go to **neurodivergentclassroom.com/learning-animal-check/start/**.
2. Enter the access code:

   Code _____
3. Choose a version: **grades 3 and 4** or **grades 5 to 12**. Each version can be done **twice**, in case something stops halfway.
4. When you're done, save the result right away (see below).

Start here

Important: save it right away

The page doesn't remember anything. Print the certificate and the result sheet right away or save both as a PDF (choose “Save as PDF” in the print window). Otherwise the result is gone once you close the page.

Cost: $2

The access code costs $2.

- ☐ The class fund covers the cost.
- ☐ Please send your child to school with $2, if possible by _____.

Privacy: No name, no sign-up. Answers and results stay on your device and aren't saved anywhere. The read-aloud voice comes from your own device.

Warm regards, _____

Please cut off and send back to school. Everything is optional.

If you like, send me the result code by _____. It helps me plan lessons that fit.
